

Rachana Sharir

This department deals with the study of anatomical structure of Human body (Dissection of cadaver). Knowledge of this subject is important not only for Physician but also for Surgeon for proper diagnosis of various diseases and for treatment of diseases.

Rachana Sharir Department follows the syllabus which is prepared by Central Council of Indian medicine also approved by MUHS Nasik. This department have the good precious museum with fibre models, functional models. Museum is decorated with laminated Ayurvedic & Modern charts. Micro-Anatomy lab in the museum consists 5 microscopes and 100 histology slides.

Body preserving tank is available with capacity of 2-4 cadavers in cadaver room. Brain & Body sectioning machine is available in dissection hall. 8 Full size and 10 Half size dissection tables are present. Dissection hall is well decorated laminated Ayurvedic and Modern Charts.

For enhancement of the learning, we will regularly update the models, charts etc. In future we are thinking to send the departmental members for different teachers training programs & to attend national & international level seminars & workshop.
