

# Roga Nidana Evum Vikruti Vigyana

## Introduction

The II<sup>nd</sup> year of B.A.M.S. plays an important role between I<sup>st</sup> year & III<sup>rd</sup> year. Among the all subjects of II<sup>nd</sup> year B.A.M.S. Rog-Nidan and Vikruti Vidnyan is the most important subject because it helps to diagnose the disease. Without proper diagnosis it is not possible to treat the patient properly.

While diagnosing the disease knowledge of Nidan Panchak (Pathological factors) is very important. The knowledge of clinical diagnosis plays an important role in the management of the disease. Rog-Nidan and Vikruti Vidnyan subject gives the very first exposure to the students about clinical diagnosis of various diseases. Despite clinical diagnosis, pathological investigations are also essential for the further management of the disease & this is also the part Rog-Nidan and Vikruti Vidnyan subject. So it is very much clear that this subject is the key to Successful Medical Practice.

Department of Rognidan & Vikruti Vidnyan has been established in May 2022. This department deals with the study of Pathology & Clinical Medicine in the perspective from Ayurveda as well as Modern science.

## Departmental Museum & Laboratory

Departmental museum contains 9 Models, 10 specimens (Histological slides) and 50 charts. It is proud thing to our Institute that, these models are prepared by our 1<sup>st</sup> year BAMS students.
